

Appendix A

CURRICULUM VITAE
STANLEY J. WATSON
REVISED AS OF: Oct. 2, 2000

CURRICULUM VITAE

PERSONAL DATA

Name: Stanley J. Watson, Jr.

Social Security Number: 240-64-6614

EDUCATION

1958 - 1961	Benjamin Franklin High School, New Orleans, Louisiana
1961 - 1962	Tulane University, New Orleans, Louisiana
1962 - 1963	Louisiana State University, New Orleans, Louisiana
1963 - 1965	University of Southern Mississippi, Hattiesburg, Mississippi; B.S. (Psychology)
1965 - 1970	University of Iowa, Iowa City, Iowa; Ph.D. (Clinical Psychology)
1970 - 1974	Tulane Medical School, New Orleans, Louisiana; M.D.

POSTDOCTORAL TRAINING

1974	Pacific Presbyterian Medical Center, San Francisco, California; Internship
1974 - 1977	Stanford University School of Medicine, Department of Psychiatry and Behavioral Sciences, Stanford, California; Psychiatric Internship and Residency
1977 - 1978	Stanford Medical Center, Department of Psychiatry, Stanford, California; Research Resident

ACADEMIC APPOINTMENTS

1978 - 1981	Assistant Professor and Assistant Research Scientist, Department of Psychiatry and Mental Health Research Institute, University of Michigan
1981 - 1987	Associate Professor and Associate Research Scientist, Department of Psychiatry and Mental Health Research Institute, University of Michigan
1983 - 1987	Director of the Experimental Clinical Endocrine Lab, Department of Psychiatry and Mental Health Research Institute, University of Michigan
1984 - 1995	Associate Director, Mental Health Research Institute, University of Michigan
1987 -	Professor and Research Scientist, Department of Psychiatry and Mental Health Research Institute, University of Michigan
1993 -	Associate Chair for Research, Department of Psychiatry
1995 -	Co-Director (with H. Akil), Mental Health Research Institute, Univ. of Mich.

CONSULTING POSITIONS

1986 - 1994	Neurex, Menlo Park, California
1992 -	Neurocrine Biosciences, La Jolla, California
1993 -	MHCRC for the Study of Suicidal Behavior, University of Pittsburgh

SCIENTIFIC ACTIVITIES

Editorial Boards

1980 - 1983	Peptides
1984	Archives of General Psychiatry
1985 - 1988	Drug and Alcohol Dependence
1986 - 1990	Neuropsychopharmacology
1986 -	Psychoneuroendocrinology

1987 - Journal of Chemical Neuroanatomy
1987 - 1993 Neurobiology of Aging
1988 - Experimental Neurology
1988 - Journal of Neuroendocrinology
1988 - Peptide Research
1985 - 1989 Neuropeptides
1989 - 1991 Neuroendocrinology
1989 - 1994 Molecular and Cellular Neurosciences
— Regular Reviewer for several journals: Science, Endocrinology, Nature,
Neuroendocrinology, PNAS, Brain Research, Regulatory Peptides, and
American Journal of Psychiatry, Journal of Psychiatric Research
1993 - Critical Reviews in Neurobiology
1994 - 1997 Neuropsychopharmacology
1995-96 Associate Editor, Journal of Chemical Neuroanatomy
1995- Molecular Psychiatry
1997 Guest editor with J. Meador-Woodruff, Journal of Psychiatric Research v.
31, no. 2.
1997- Molecular Neurobiology
Investigation, Board of Consulting Editors
Bipolar Disorders, An International Journal of Psychiatry and
Neurosciences, Editor
1999- Current Psychiatry Reports
2000 The Journal of Clinical Investigation, Consulting Editor

Study Sections

Site Visitor and Substitute Reviewer: NIMH, NIDA, NINCDS, N.I.H. and N.S.F.

GRANT SUPPORT
ACTIVE

P01 MH42251-11 (Watson and Akil) 12/01/96 - 11/30/01
NIMH \$543,290 Annual Direct Costs

Molecular Elements, Neurocircuits and Mental Illness

The **overall** purpose of this Program Project is to continue to investigate the **neurobiology of stress and depression**, using a combination of anatomical, molecular biological, endocrine, and behavioral tools, in the context of four individual projects. The main focus is to understand the **limbic neuronal circuits** which participate in the evaluation of stressors, and transduce the activation and termination of stress responses.

Subproject 1 (Watson) 10%

The goal of this project is two-fold: 1) to increase our understanding of the **neuronal circuitry** critical to stress activation, stress termination, and the differential stress responsiveness across the circadian rhythm of the rat; and 2) to understand how this circuitry may be differentially activated as a function of the nature of the stressor (i.e., the ability of the animal to cope with it) and as a function of individual differences.

Subproject 2 (Akil) 5%

The focus of this proposal is to study how the limbic-hypothalamo-pituitary-adrenal (LHPA) axis changes as a function of early developmental events and exposure to repeated stress, and how these factors contribute to individual differences in stress responsiveness throughout life, including during the aging process.

Subproject 3 (Watson) 10%

Studying the neuroanatomical substrates of **stress, suicide and depression** in human brain is the central theme of this project.

Subproject 4 (Akil) 5%

These studies should shed light on the extent of the relationship between major depression and the dysregulation of stress responsiveness.

R01 DA02265 (Akil) 05/01/95 - 03/31/00 10%

NIDA \$202,264 Annual Direct Costs

Mu and Delta Receptors: Role in Transmission and Addiction

The purposes of this project are 1) to clone and compare multiple kappa receptors across species, including rat, mouse, guinea pig and man. 2) to characterize these receptors in terms of their signal transduction pathways. 3) to characterize these receptors in terms of their structure-function relationships. 4) to study the tissue-specific expression of these receptors. 5) to study the regulation of the newly cloned receptors.

R01 DA08920 (Akil) 05/01/98 - 04/30/99 10%

NIDA \$155,161 Annual Direct Costs

Molecular Studies of Kappa Opioid Receptors

The purpose of this project is to investigate, at the molecular and integrative levels, the biology of the newly cloned mu and delta opioid receptors, attempting to understand how these molecules function as units, and how they interact with other brain molecules to modulate critical functions such as pain and drug reward.

Stanley Foundation 8/01/96 – 8/31/00 0% No-Cost Time
 Extension
 Analysis of Monoamine Cell Groups in Major Psychiatric Syndromes

This research will answer key questions about the role of monoaminergic transmission in the major psychiatric conditions; schizophrenics, schizo-affectives, depressed patients, patients with bipolar affective disease. This represents the first integrated view of these monoamine transmitter systems in the same set of brain tissue.

The Pritzker Foundation 7/01/97 – 11/30/99 17%
 \$245,000 Annual Direct Costs

The Nancy Friend Pritzker Network for Depression Research
 PI: J.D. Barchas, Cornell University; Co-PI: Watson, Akil, Greden, Young, Burmeister, Lopez, Vazquez, Zubieta
 These funds are to establish a collaborative set of interactions between Michigan, (eight investigators listed as PI's), Cornell (Jack Barchas, PI) and Stanford University (Schatzberg, Co-PI). Collaborative research across nodes focuses on the clinical aspects of depression. The above amount is assigned to the Michigan node.

Robert Wood Johnson Foundation (Watson) 7/1/98-6/30/02 0%
 \$71,326 Annual Direct Costs

Opioid and Glucocorticoid Receptors in the Developing Human and Rat CNS
 The purpose of this grant is to study the development of endogenous opioid receptors and corticosteroid receptors in the human and rat brain, and to determine the effects of in utero or postnatal exposure to opiates, steroids or stress on this development at the cellular and molecular level.

NIDDKD (Yamada) 12/1/95-11/30/00 0%
 \$20,522 Annual Direct Costs

Gastrointestinal Hormone Core Center, Biochemistry Core
 These funds are for Center Core functions in gastro-intestinal peptide biology

PENDING

NIH-NIDA (Akil) 5/1/99 - 4/30/04 10%
 \$170,670 Annual Direct Costs

The Orphanin System: Role in Stress and Addiction
 This proposal is focused on studying the newly discovered Orphanin/Nociceptin system (QFQ system), a new peptidergic system, evolutionarily related to the endogenous opioids but exhibiting distinct biochemical, anatomical and functional properties.

NIH (Watson) (Bunney-UCI) 7/1/99-6/30/04 5%
 (Sub-Contract to University of California-Irvine) \$118,247 Annual Direct Costs
 MRNA Regulation in Depression: Candidate & Array Studies

The purpose of this project is to study the genetic, molecular, and biochemical causes of mood disorders, using two major approaches to the study of alterations in gene expression; 1) The expression candidate approach, relying on classical tools such as *in situ* hybridization to characterize *known gene products* and 2) The expression array approach which will rely on the new microarray and DNA chip technologies to screen for known and unknown genes whose expression may be altered in depression.

CERTIFICATION AND LICENSURE

1973 - 1978	Licensed Clinical Psychologist, Louisiana
1974 -	Licensed Medical Doctor, Louisiana
1975 -	Licensed Medical Doctor, California
1978 -	Licensed Medical Doctor, Michigan
1979	Board Certified in Psychiatry and Neurology

HONORS AND AWARDS

1960	National Merit Scholarship Finalist
1961 - 1969	Academic Honors Scholarship at Tulane University and University of Southern Mississippi
1964	Member Psi Chi (Psychology Honor Scholarship) Graduated with Honors
1965 - 1969	Academic Scholarship, Iowa Graduate School
1974	Merck Award, Tulane Medical School
1977	Bank of America—Giannini Fellowship in Biomedical Research
1980	McAlpin Grant Recipient, (for an on-going contribution to mental health research), named by Dr. Floyd Bloom, National Mental Health Association's 1980 McAlpin Award Winner
1984	Grass Foundation Lecturer, University of Pittsburgh
1984	Pfizer Visiting Professorship in Psychiatry, Sinai Medical Center, New York
1985	Visiting Professor, University of Hawaii
1985	Pfizer Travelling Fellow of the Clinical Research Institute of Montreal
1987	Honorary Member, Alpha Omega Alpha, University of Michigan Chapter
1988	University of Michigan Senior Research Scientist Lectureship Award
1993	Theophile Raphael Professor of Neurosciences in Psychiatry
1994	Pfizer Visiting Professorship in Psychiatry, Johns Hopkins University Med. Ctr.
1994	Co-recipient (with H. Akil) of the Robert J. and Clair Pasarow Foundation Award for Neuropsychiatric Research.
1996	Michigan Scientific Club
1999	Principal Servant, Michigan Scientific Club

MEMBERSHIPS AND OFFICES IN PROFESSIONAL SOCIETIES

	Alpha Omega Alpha Honor Medical Society

1988 - 1989	Chair, Program and Scientific Communications Committee, American College of Neuropsychopharmacology
1991 - 1992	Chair, Program Committee, Society for Neuroscience
1993	President of the Annual Meeting of the Association for Research in Nervous and Mental Disease
1994 -1998	Member, CINP Council
1994-97	Member, ACNP Committee on Relationships with Advocacy Groups
1994-1996	Member, ACNP Task Force on Continuing Education
1994-1996	Member, CINP Credentials Committee and Membership Committee
1995-1997	Chair, ACNP Nominating Committee
1995-	Member, Society for Neuroscience Finance Committee
1995-1996	Member, Society of Biological Psychiatry's A.E. Bennett Award Committee
1996-1997	Member, ACNP Finance Committee
1996-1997	Member, ACNP Sub-Committee on Continuing Education
1997-	Member, The Dana Alliance for Brain Initiatives
1997-	Chair, Board of Scientific Counselors for NIMH
1997-	Member, ACNP Council
1998-	Member, ACNP Constitution and Rules Committee
1999	Member, Review Committee for NIDA Director (Alan Leshner for Harold Varmus)
2000-03	Member, Scientific Advisory Panel, American Psychiatric Institute for Research and Education

TEACHING

University of Michigan

1980 -	Neuroscience for Psychiatrists, University of Michigan, Co-taught with H. Akil (taught annually)
--------	--

EXTRAMURAL INVITED PRESENTATIONS

1. Melatonin and pineal extracts. Presented at the Asilomar Conference on Neuroregulators and Hypotheses of Psychiatric Disorders, Pacific Grove, California, January, 1976.
2. Similarities in neurotransmitter modulation of electrical and morphine analgesia. Presented at the International Symposium on Factors Affecting the Action of Narcotics at Institute Mario Negri, Milan, Italy, July, 1976.
3. Studies on the opiate peptides. Presented at the Gordon Research Conference on the Mode of Action of Opiates, Wolfeboro, New Hampshire, June, 1977.
4. Immunocytochemical and biochemical studies of the enkephalins, beta-endorphin, and related peptides. A paper presented at the Conference on the Endorphins, Brescia, Italy, August, 1977.
5. In a symposium entitled Histochemistry in Psychiatry at the Annual Meeting of the Society of Biological Psychiatry, Atlanta, Georgia, May, 1978.
6. Some anatomical and physiological studies of opiate peptides and related substances. Presented at the New Jersey Health Science Group Symposium on Nature's Own Opiates: The Morphine Related Substances in Brain at Rutgers Medical School, July, 1978.
7. Immunocytochemical studies of the endogenous opiate peptides and related substances. Presented at the 11th Miles International Symposium: Mechanisms of Pain and Analgesic Compounds, Baltimore, Maryland, June, 1978.
8. Immunocytochemical studies of enkephalins, β -endorphin, β -LPH, and ACTH in rat brain. Presented at the Annual Meeting of the International Narcotic Research Conference, Noordwijerhout, The Netherlands, July, 1978.

9. Immunohistochemical studies on the anatomical relationship between the opiate peptide system and catecholamine systems in rat brain. Presented at the Fourth International Catecholamine Symposium, Asilomar, California, September, 1978.
10. Opiate peptide anatomy: An overview. A paper presented at the Annual Meeting of the American Congress of Neuropharmacology, Maui, Hawaii, December, 1978.
11. Endorphins: Clinical issues. A paper presented at Psychiatric Factors in Drug Abuse at the University of Minnesota, March, 1979.
12. Problems in demonstrating two peptides in the same neuron. A paper presented at the Annual Meeting of the Histochemical Society, Keystone, Colorado, April, 1979.
13. Anatomical and biochemical studies of brain beta-endorphin and alpha-MSH. A paper presented at the X Congress of the International Society of Psychoneuroendocrinology, Park City, Utah, August, 1979.
14. Relationship between alpha-MSH and beta-endorphin in brain: Anatomical and biochemical studies. A paper presented at Regulation and Function of Neural Peptides, Brescia, Italy, August, 1979.
15. β -Endorphin and ACTH function: Pre- and post-synaptic phenomena. A paper presented at the Annual Meeting of the German Pharmacological Society, Munich, Germany, September, 1979.
16. Endorphin and enkephalin pathways in the brain. A paper presented at The Brain as an Endocrine Target Organ in Health and Disease, Bordeaux, France, October, 1979.
17. Anatomy of the opiate peptides systems. A symposium presentation at the Annual Meeting of the American Association for the Advancement of Science, San Francisco, January, 1980.
18. Anatomy of peptidergic systems. A symposium presented at the Conference on Neuropeptides, Copper Mountain, Colorado, January, 1980.
19. Opioid peptides and related substances. A paper presented at a workshop of the National Institute of Neurological, Communicative Diseases and Stroke, on Neurosecretion and Brain Peptides: Implications for Brain Function and Neurologic Disease, Sea Island, Georgia, March, 1980.
20. Endorphins and psychosis: An overview. A symposium presented at the Annual Meeting of the American Chemical Society, June, 1980.
21. Anatomical and biochemical studies of the opioid peptides and related substances in brain. Presented at the Fourth Brain-Endocrine Interaction Symposium, Rochester, New York, September, 1980.
22. Central nervous system immunocytochemistry of opiate peptides: Beta-endorphin, alpha-MSH, and dynorphin systems. A symposium presented at the Society of Neuroscience, November, 1980.
23. Anatomical and biochemical studies of dynorphin. Presented at the International Narcotic Research Conference, Kyoto, Japan, July, 1981.
24. Recent immunocytochemical studies of the opioid peptides: Relationship between dynorphin and enkephalin system. Presented at the International Narcotic Research Conference, Falmouth, Massachusetts, June, 1982.
25. Future clinical significance. Presented at the Symposium Opioids: Past, Present and Future, held in honor of the 80th birthday of Hans W. Kosterlitz. Cambridge, England, April, 1983.

26. *In situ* hybridization of beta-endorphin mRNA in brain and pituitary. Presented at the Fifth BMRC Research Forum, University of Michigan, March, 1983.
27. Pituitary peptides in depression. Presented at the Meeting of the American Psychiatric Association, New York, May, 1983.
28. β -Endorphin in depression. Presented at the International Narcotic Research Conference, Garmisch, West Germany, June, 1983.
29. The use of anatomical tools in the study of brain opioid peptides: Immunocytochemistry, receptor autoradiography, and *in situ* hybridization of specific mRNAs. Presented at the Annual Meeting of the American College of Neuropsychopharmacology, San Juan, Puerto Rico, December, 1983.
30. Specific mRNA qualitation and quantitation. Presented at the Michigan Chapter, Society for Neuroscience, Ann Arbor, Michigan, March, 1984.
31. Opiates. Presented at the Vasopressin Conference, Aspen, Colorado, 1984.
32. Multiple opioids from the same precursor: Which is the real product? Presented at the International Narcotic Research Conference, Cambridge, England, July, 1984.
33. Molecular biology for psychiatrists. Pfizer Visiting Professor of Psychiatry. Presented at the Mt. Sinai Medical Center, New York, November, 1984.
34. New approaches to the study of the anatomy and regulation of neuropeptides and related mRNA in CNS. Presented at the 6th Annual Meeting of the Association for Research in Nervous and Mental Disease, New York, November, 1984.
35. Neuropeptide regulation and processing in CNS: Implications for studies of CSF. Presented at the Twenty-third Annual Meeting of the American College of Neuropsychopharmacology, San Juan, Puerto Rico, December 1984.
36. The ACTH beta-endorphin system: Regulatory and clinical studies. Presented at the University of California-San Diego, Grand Rounds Lecturer, February, 1985.
37. The use of molecular biology in a neuronal anatomical context. Presented at the Clinical Research Institute of Montreal, Canada, February 25, 1985.
38. Hybridization histochemistry in brain. Invited Lecturer, Department of Biochemistry, University of Hawaii, March, 1985.
39. Regulatory biology of the POMC systems in pituitary and brain. Guest Lecture Program University of Iowa College of Medicine, Iowa City, Iowa, April, 1985.
40. HPA axis dysregulation in depression: Focus on pituitary functioning. Guest Lecture Program, University of Iowa College of Medicine, Iowa City, Iowa, April, 1985.
41. Strategies for using and expanding cDNA probes as neuroanatomical tools. Presented at the Association of Anatomy Chairman Symposium, Toronto, May 6, 1985.
42. The ACTH/beta-endorphin system: Basic and clinical studies. Presented at the Meeting of the Society of Biological Psychiatry, Dallas, Texas, May, 1985.
43. Neuropeptide biology: Basic and clinical lessons from the opioids. Presented at the American Psychiatric Association Annual Meeting, Dallas, Texas, May, 1985.
44. Studies on mRNA of the endorphins and related peptides: Logical considerations and physiological and anatomical studies. Symposium: Molecular biological approaches. Presented at the International Narcotics Research Conference, North Falmouth, Massachusetts, 1985.

45. Neuroanatomical methodology: Perspectives on *in situ* hybridization. Symposium presented at the Society for Neuroscience (Chairman), Dallas, Texas, October, 1985.
46. The hypothalamus pituitary adrenal axis: Clinical and regulatory studies. Invited Lecturer: Nancy W. Werblow Lectureship, Cornell University Medical College, November 13, 1985.
47. Anatomy and regulation of opioid peptides mRNAs. Symposium: Genes, Messages and Their Products: Strategies for Studying Regulations, at the Meeting of the American College of Neuropsychopharmacology, Maui, Hawaii, December, 1985.
48. *In situ* hybridization in neuropeptide systems. (Chair): Session on peptide gene expression: Anatomy and regulation. Presented at the Conference on In Situ Hybridization for Brain Peptides. Howard Hughes Conference Center, Coconut Grove, January, 1986.
49. *In situ* hybridization in nervous tissue: Logical and technical considerations. Presented at the Symposium on In Situ Hybridization Methods. Sponsored by Network I of the Mac Arthur Foundation and the Nancy Pritzker Laboratory of the Stanford Department of Psychiatry, Stanford, California, January, 1986.
50. Regulatory studies of the HPA axis: Basic and human perspectives. Pfizer Visiting Professor of Psychiatry. Presented at the New York University Medical Center, February, 1986.
51. Hypothalamo-pituitary-adrenal axis regulation: Basic and clinical studies. Grand Rounds Visiting Lecturer, New York Hospital-Cornell Medical Center, White Plains, New York, March, 1986.
52. Studies of Peptide mRNAs in neurons: The logic of *in situ* hybridization. Presented at the Neural and Behavioral Biology Seminar, University of Illinois at Urbana-Champaign, Illinois, April, 1986.
53. Opioid systems in nervous tissue: Anatomical approaches to biochemistry. Presented at the International Narcotics Research Conference, San Francisco, July, 1986.
54. Localization of enkephalin and endorphin messenger RNA's by *in situ* hybridization. Presented at the American Society for Pharmacology and Experimental Therapeutics, Baltimore, August, 1986.
55. Regulation of endorphins and related peptides in normal and abnormal states. Invited speaker, Brown University, Providence, November, 1986.
56. Biochemical anatomy of neuropeptide systems in brain. Invited speaker, University of Iowa, Iowa City, November, 1986.
57. Biochemical anatomy of the endogenous opioid system: Immunocytochemistry receptor audiography and *in situ* hybridization. Distinguished Scientist Seminar Series, Eastern Virginia Medical School, Norfolk, December, 1986.
58. Biochemical anatomy of peptidergic systems in brain. Presented at the Meeting of the American College of Neuropsychopharmacology, Washington, D.C., December, 1986.
59. Regulation of peptide mRNAs as a window into cellular activity: Northern and *in situ* analyses. Presented at the Gordon Research Conference on the Mode of Action of Opiates, Santa Barbara, California, February, 1987.
60. Invited participant at the Meeting on "Essential Topics of Future Research in Psychiatry." Max-Planck-Haus Heidelberg, Germany, February 27-28, 1987.
61. Neuropeptides. Science Strategy and Planning Neuroscience Symposium. Invited Lecturer, Squibb Corporation, Princeton, New Jersey, May, 1987.

62. *In situ* hybridization: Technical issues and future perspectives. Invited Guest Lecturer at the Cold Spring Harbor Course entitled, "Molecular Cloning of Neural Genes." Cold Spring Harbor Laboratory, New York, August, 1987.
63. Biochemical anatomy of the endogenous opioids and the hypothalamo-pituitary-adrenal axis: Regulatory studies of mRNA, receptors, and peptides. Distinguished Visiting Scientist of the Laboratory of Neuroendocrinology of the Brain Research Institute, UCLA, Los Angeles, September, 1987.
64. Biochemical anatomy of endogenous opioid systems. Invited Speaker, Upjohn Symposium on Kappa Opioid Receptor Agonists. Kalamazoo, Michigan, September 30 to October 2, 1987.
65. *In situ* hybridization studies of neuropeptide systems. Invited speaker, Symposium on Molecular Biology of Brain and Endocrine Peptidergic Systems. Co-Sponsored by the Canadian Biochemical Society and the International Foundation for Biochemical Endocrinology, Montreal, October 13-16, 1987.
66. Biochemical anatomy: Studies of neuropeptidergic systems. Invited Lecturer, Albert Einstein University, Bronx, New York, March 9-10, 1988.
67. Anatomical and biochemical studies on the regulation of neuropeptides in brain: The endorphins and related endocrine systems. Invited Lecturer, Princeton University, Princeton, New Jersey, March 10, 1988.
68. The neuropeptides: Their regulation and their pathways. Symposium sponsored by the Addiction Research Foundation of Palo Alto and the Stanford University School of Medicine entitled "Molecular and Cellular Aspects of the Drug Addiction, Stanford, California, April 13, 1988.
69. Biochemical anatomy of neuropeptide systems: Regulatory studies. Symposium presented at the Society for Neuroscience, Toronto, Canada, 1988.
70. Regulation of neuropeptide gene products. Presented at the Meeting of the American College of Neuropsychopharmacology, San Juan, Puerto Rico, December, 1988.
71. Regulation of neuropeptide systems by *in situ* hybridization of mRNA: Peptide, enzymes and receptors. Presented at the Miami Bio/Technology Winter Symposium, Miami, Florida, February, 1989.
72. Regulation of the brain stress axis: Basic and clinical. Invited Speaker, Columbia University, New York, March, 1989.
73. Regulation of brain peptide systems: Basic and clinical. Invited Speaker, Duke University, Durham, North Carolina, March, 1989.
74. The brain's stress system: Regulation and circuitry. Invited Speaker, Fishberg Center, Mt. Sinai Medical Center, New York, March, 1989.
75. Regulation of limbic components of the hypothalamo-pituitary-adrenal axis. Invited Symposium Speaker, American Psychiatric Association, San Francisco, May, 1989.
76. Analysis of mRNA regulation in CNS by *in situ* hybridization: Receptor, enzymes and peptides. Invited Speaker, Western Psychiatric Institute and Clinic, University of Pittsburgh, May, 1989.
77. Investigations into the brain's stress axis: Basic and clinical perspectives. Invited Speaker, Clinical Research Center for Affective Disorders, University of Pittsburgh, May, 1989.
78. Regulation of limbic components of the hypothalamo-pituitary-adrenal axis. Invited speaker, American Psychiatric Association Annual Meeting, San Francisco, May, 1989.

79. Regulations of Expression of Genes Related to Neurotransmission. Presented at the University of Chicago, Chicago, Illinois, October, 1989.
80. Localization of Neuropeptides. Presented at the Plenary Session, Satellite of the 19th Annual Meeting of the Society for Neuroscience, Tucson, Arizona, October, 1989.
81. mRNA Distribution and Regulation of Glucocorticoid and Mineralocorticoid Receptors in Brain. Presented at the American College of Neuropsychopharmacology, Maui, Hawaii, December 13, 1989.
82. Site-Specific Expression and Regulation of the Dopamine D₂ Receptor. Presented at the American College of Psychopharmacology, Maui, Hawaii, December 13, 1989.
83. *In situ* Hybridization: An Approach to Brain Regulation. Presented at ISU Life Sciences Symposium, Iowa State University, Ames, Iowa, March 9-10, 1990.
84. Receptors *In situ*. Presented at the Vollum Institute, The Oregon Health Sciences University, Portland, Oregon, May, 1990.
85. Research into the biology of mental illness: Problems and perspectives. Presented at the State Alliance for the Mentally Ill of Michigan, Southfield, Michigan, May, 1990.
86. Molecular and neuronal aspects of the brains stress axis - peptide and steroid receptor studies. Presented at XXI Congress of the International Society of Psychoneuroendocrinology, Buffalo, New York, Aug. 20-24, 1990.
87. Hypothalamo-Pituitary-Adrenal Axis: Neuropeptide and Steroid Regulation. Presented at the 17th Congress of Collegium Internationale Neuro-Psychopharmacologicum, Kyoto, Japan, September, 1990.
88. In Search of a Kappa Receptor Functional Anatomy. Presented at the Kappa Receptor 1990 Asilomar Meeting, Pacific Grove, California, September, 1990.
89. Gene Activation in Neuropeptide Systems: Early Genes and Transcriptional Analysis *in situ*, presented at the American College of Neuropsychopharmacology Meeting, San Juan, Puerto Rico, December 10-14, 1990.
90. Functional Anatomy of Opioids and Their Receptors. Presented at The First UCLA-NIDA Conference on Drug Abuse, A "Decade of the Brain" Symposium, January 10-12, 1991.
91. Monoamine Receptor Systems in Brain: Anatomical and Regulatory Genetic Studies. Invited Speaker, Yale University, New Haven, Connecticut, March, 1991.
92. Molecular Genetics and Anatomical Circuits in the Brain's Stress Axis. Invited Speaker, St. Louis University School of Medicine, St. Louis, Missouri, April, 1991.
93. D₁ and D₂ Receptors in Brain: Forms, Functions and Circuits. Invited Speaker, International Congress on Schizophrenia Research, Tucson, Arizona, April 21-25, 1991.
94. The Brain's Stress Axis: An Update. Invited Speaker, American Psychiatric Association Annual Meeting, New Orleans, Louisiana, May 11-16, 1991.
95. Multiple Dopamine Receptor Systems in Brain: Molecular, Anatomical, Regulatory and Circuit Studies. Invited speaker. Cornell University Medical College, White Plains, New York, October 2-3, 1991.
96. Dopamine Receptor Genetics and Circuits in CNS. Presented at European College of Neuropsychopharmacology, Monte Carlo, Monaco, October 6-9, 1991.
97. The Brain's Stress Axis: Basic and Postmortem Studies. Invited speaker. Third Annual Bristol Myers Squibb Symposium on Neuroscience Research, Yale University School of Medicine, New Haven, Connecticut, October 25-26, 1991.

98. The Brain's Stress Circuit: Anatomy and Regulation. Invited Speaker, Indiana University, Indianapolis, Indiana, November 20, 1991.
99. Stress and the Brain: Anatomical and Molecular Genetic Studies. Invited Speaker, Case Western Reserve University, Cleveland, Ohio, March, 1992.
100. Stress Modulating Systems in the Brain: Molecular and Anatomical Studies. Grass Traveling Lecturer, The University of Georgia, Athens, Georgia, April, 1992.
101. The Dopamine Receptor Super-Family and Its Implications for Psychiatry. Presented at the American Psychiatric Association Annual Meeting, Washington, DC, May, 1992.
102. The Brain's Stress Axis: Molecular, Biological and Neuron Circuit Analyses. Invited Speaker, University of Minnesota, Minneapolis, Minnesota, May, 1992.
103. Anatomical and regulatory studies of peptide processing enzymes in specific brain circuits. Presented at the XVIIIth C.I.N.P. Congress, Nice, France, June 28-July 2, 1992.
104. Control of CRF cellular activity by circuits in the CNS: Anatomical and molecular genetic studies. Presented at the XXIII Congress of the International Society of Psychoneuroendocrinology, University of Wisconsin-Madison, August 14-21, 1992.
105. Dopamine receptor subfamily: A complex story of interest to psychiatry. Invited Speaker, University of Pittsburgh, Pittsburgh, PA, November 13, 1992.
106. The Brain's Response to Stress: Glucocorticoid and Serotonin Receptors and Circuits: Invited Speaker, University of Washington School of Medicine, Seattle, WA, January 13, 1993.
107. Anatomical and regulatory studies of dopamine and serotonin receptor systems: Invited Speaker, University of Vermont College of Medicine, Burlington, VT, April 9, 1993.
108. *In situ* hybridization of prohormone converting enzymes in brain: Invited Speaker, 50th Swammerdam Lecture - Netherlands Institute for Brain Research, Amsterdam, The Netherlands, September 10, 1993.
109. Cloning, expression, and localized expression of rat kappa opiate and other receptors: Invited Speaker, NIDA Technical Review Meeting on "Molecular Neurobiology and Pharmacology of Opiate Receptor Subtypes: A Tribute to William Martin", Washington, DC, November 6-7, 1993.
110. Stress systems in brain: Circuits and molecules. Invited Speaker, Emory University School of Medicine, Atlanta, Georgia, February 16, 1994.
111. The brain's stress axis: anatomical and molecular studies. Invited Speaker, University of Iowa School of Medicine, Iowa City, Iowa, March 14-15, 1994. The brain's stress axis: anatomical and molecular studies. Invited Speaker, Johns Hopkins University School of Medicine, Baltimore, MD, April 20-21, 1994.
112. What can we learn about depression from the studies of the stress axis? Invited Speaker, Pfizer Visiting Professorship Program in Psychiatry at Johns Hopkins University School of Medicine, Baltimore, MD, April 20-21, 1994.
113. The brain's stress circuits. Keynote Speaker for Department of Psychiatry Research Retreat, University of Pennsylvania, Philadelphia, PA, April 21, 1995. The brain's systems for responding to stress. Grand Rounds Speaker, Department of Psychiatry, New York University Medical Center, New York, NY, March 14, 1996.
114. Stress and depression: anatomical studies in brain. Grass Foundation Lecture Speaker, Department of Psychiatry, University of Texas Health Science Center, San Antonio, Texas, June 6, 1996.

115. How the brain handles stress: Anatomical and molecular analyses. Invited Speaker, Department of Neurobiology, Stanford University School of Medicine, Stanford, California, November 7, 1996. How the brain handles stress: Anatomical and molecular analyses. Invited Speaker, Neurobiological Technologies, Inc., Richmond, California, November 8, 1996.
116. The Brain's Stress Axis: Anatomical and Molecular Studies. Invited Speaker, Department of Psychiatry, Sinai Hospital, Detroit, Michigan, January 8, 1997.
117. The Brain's Stress Axis: Anatomical and Molecular Studies. Invited Speaker, Oregon Regional Primate Research Center, Oregon Health Sciences University, Portland, Oregon, February 13, 1997.
118. The Brain's Stress Axis: Fundamental Molecular and Anatomical Studies. Invited Speaker, Dean's Distinguished Lecture Series Speaker, University of Arkansas for Medical Sciences, Little Rock, Arkansas, March 20, 1997.
119. Stress, Depression, and Suicide: Is There a Connection? Invited Speaker, Department of Psychiatry, University of Arkansas for Medical Sciences, March 21, 1997.
120. How does the brain regulate the stress response: Anatomical and biochemical perspectives? Presented at the 6th World Congress of Biological Psychiatry, Nice, France, June 25, 1997.
121. Molecular and circuit targets for drug development in the brain's stress systems. Presented at the 6th World Congress of Biological Psychiatry, Nice, France, June 26, 1997.
122. Very basic molecular biology. Presented at the XXVIIIth ISPNE Congress, San Francisco, California, July 27, 1997.
123. Brain's stress system: Molecular and anatomical studies. 1997-98 Visiting Professorship Lecture, University of Pittsburgh, Pittsburgh, Pennsylvania, November 17, 1997.
124. Localization of opiate receptors and related molecules at the light microscopic level. Presented at the 29th International Narcotics Research Conference, Garmisch-Partenkirchen, Germany, July 20-25, 1998.
125. Serotonin gene effects and psychopathology. Co-Chair at the ACNP Annual Meeting, Las Croabas, Puerto Rico, December 12-19, 1998.
126. Neural circuits mediating stress and anxiety. Presented at the Anxiety Disorders Association of America Meeting, San Diego, California, March 24-28, 1999.
127. Biochemical and neuroendocrine markers in psychiatric disorders. Presented at the Biomarkers and surrogate endpoints: Advancing clinical research and applications meeting, Bethesda, Maryland, April 15-16, 1999.
128. Medical marijuana. Presented at the American College of Physicians/American Society of Internal Medicine meeting, New Orleans, Louisiana, April 25, 1999.
129. POMC: A molecule with nine lives. Keynote speaker at Cold Spring Harbor Laboratory Fifth Annual President's Council Meeting, New York, May 14-15, 1999.
130. POMC and AGRP: Relationships and complexities. Presented at the 1999 Neuroendocrine Workshop on Energy Balance, Food Intake and Obesity Meeting, San Diego, California, June 9-11, 1999.
131. Anatomical and molecular regulation of the brain's stress axis. Presented at Parke-Davis-Warner Lambert, Ann Arbor, Michigan, April 18, 2000.
132. Gene expression arrays: Their power and their limits. Presented at the Society of Biological Society meeting, Chicago, Illinois, May 11-13, 2000.

133. Stress biology in rodent and human brain. Presented at the University of Chicago Annual Neuroscience Day Meeting, Chicago, Illinois, May 12, 2000.
134. Depression and stress: Molecular and anatomical studies in brain. Distinguished Visiting Scientist Lecture Series, Neuropharmacology and Neuroscience Research Group, The Albany Medical College, Albany, New York, October 25, 2000.

COMMITTEE AND ADMINISTRATIVE SERVICE

International and National

1979 - 1982	Public Information Committee - Neuroscience Society
1984	Evaluation Panel Member, NIMH Neurosciences Research Branch
1985 - 1988	Executive Committee, International Narcotics Research Conference
1985 - 1996	Advisory Board - Scottish Rite Schizophrenia Program
1986 - 1989	Neuroscience Program Committee
1986 - 1989	Program and Scientific Communications Committee, American College of Neuropsychopharmacology (Co-Chair, 1987-88; Chair, 1988-89)
1988 - 1992	NIMH Extramural Science Advisory Board Member
1990	Co-Organizer UCLA Meeting on Molecular Neurobiology
1991	Pfizer Scholars Program for New Faculty Academic Advisory Board Member
1991 - 1992	Chair, Program Committee, Society for Neuroscience
1993 - 1994	Science Advisory Board of the University of Rochester MHCRC for the Study of Suicidal Behavior
1993	President, ARNMD
1994 - 1997	Member, Michigan Biotechnology Association
1994 - 1998-	Member, CINP Council
1994 - 1996	Member, CINP Credentials and Membership Committee
1994-96	Member, ACNP Committee on Relationships with Advocacy Groups
1994 - 1996	Member, ACNP Task Force on Continuing Education
1995-	Chair, ACNP Nominating Committee
1995 - 1996	Member, Society for Neuroscience Finance Committee
1996-	Member, External Advisory Board for the Harvard Brain Tissue Resource Center
1996-97	Member, External Advisory Panel of the Drug Abuse Research Center for Dr. Sol Snyder (Johns Hopkins)
1996-97	Member, External Advisory Board for the Center for the Neuroscience of Mental Disorders, University of Pittsburgh
1997-99	Chair, NIMH Board of Scientific Counselors
1997	Member, NIMH Search for Scientific Director
1997	Member, External Advisory Board for the NIMH Program Project Grant for Dr. Ermino Costa (University of Chicago)
	Member, CINP International Scientific Program Committee
	Member, Academic Advisory Board, Pfizer Postdoctoral Fellowship Program
2000-02	Member, American Psychiatric Association Committee on Basic Science

Institute of Medicine

1995-96	Vice-Chair, Institute of Medicine Committee to Identify Strategies to Raise the Profile of Substance Abuse and Alcoholism Research
Co-Chair, Institute of Medicine Committee	Medicine Study on the Clinical Value and Uses of Marijuana
1999-02	Member, Board on Neuroscience and Behavioral Health

University of Michigan

1982 - 1985	Residency Research Track Committee, Department of Psychiatry
1983 -	Executive Committee, Mental Health Research Institute
1984 - 1987	Appointments and Promotions Committee, Department of Psychiatry

1985	Chairman, Search Committee, Biochemical Neurobiology Positions, Mental Health Research Institute
1985 - 1987	Member Search Committee for Chairman of Anatomy
1985 - 1990	Executive Committee, Gastrointestinal Peptide Hormone Center
1985 - 1989	Endocrinology and Metabolism NIH Training Grant Selection Committee
1988 - 1989	Chairman, Appointments and Promotions Committee, Department of Psychiatry
1988 - 1990	Member, Operating Committee of the Biomedical Research Division, Michigan Diabetes Research and Training Center
1988 - 1990	Member, Operating Subcommittee of the Clinical Research Center
1990 - 1992	Member, University of Michigan Endocrine and Metabolism Chair Search Committee
1990 - 1996	Member, Research Assay Support Laboratory (RASL) Committee
1991 - 1992	Chair, Internal Review Committee, Department of Psychiatry
1993 - 1994	Member, Director of Psychobiology Laboratory Search Committee, Ann Arbor VA Medical Center
1993 -	Member, GI Pilot Project Review Committee
1993 -	Chair, MHRI Recruitment Committee
1993 - 1995	Member, Search Committee for the Child & Adolescent Psychiatry Hospital Service Chief
1993-1994	Member, Cellular & Molecular Biology Student Seminar Committee
1994-1995	Member, Cellular & Molecular Biology Admissions Committee
1995- 1998	Member, Medical School Executive Committee
1997- 1998	Member, Medical School Advisory Council on Clinical Research
	Member, University of Michigan Alcohol Research Center Internal Advisory Committee (12/1/98-11/20/03)
1999	Acting Chair of Psychiatry – during 6 months of current Chair’s sabbatical
1999 -	Genomic/Microarray Technologies Task Force for the Michigan Life Sciences Research Corridor Initiative
2000-	Member, OVPR Advisory Council (OAC)
2001	Member, Research Advisory Board for the Office of Research and Graduate Studies

ARTICLES AND BOOK CHAPTERS SUBMITTED FOR PUBLICATION AND IN PREPARATION:

1. Bagnol, D., Mansour, A., Reinscheid, R., Civelli, O., Akil, H. and Watson, S.J.: OrphaninFQ peptide and receptor distribution in the rat gastrointestinal tract: An immunohistochemical and *in situ* hybridization study. In prep.
2. Bagnol, D., Lopez-Figueroa, M.O., Zimmerman, C? and Watson, S.J.: Expression differences in nitric oxide synthases and opioid peptide mRNAs in acute and chronic large intestine inflammation in the rat. In prep.
3. Caamaño, C.A., Morano, M.I., Watson, S.J. and Akil, H.: *In vitro* association of the 90-kDa heat shock protein with a bacterially expressed glucocorticoid receptor: Functional and structural implications. In preparation.
4. Campeau, S., Akil, H. and Watson, S.J.: Lesions of the lateral nucleus of the amygdala but not of the auditory cortex attenuate the release of corticosterone and the induction of forebrain *c-fos* mRNA associated with audiogenic stress. In prep.
5. Campeau, S., Akil, H., Dolan, D. and Watson, S.J.: Chronic intermittent loud noise exposure produces habituation of the behavioral and neuroendocrine responses compared to acutely stressed rats. In prep.
6. Chamberlin, N.L., Mansour, A., Watson, S.J. and Saper, C.B.: Localization of mu opioid receptors on amygdaloid projection neurons in the parabrachial nucleus of the rat. Inprep, 10/98.
7. Ciofi, P., Dutoit, S., Vandenbulcke, F., Mansour, A., Watson, S.J., Akil, H., Tramu, G. and Beauvillain, J.-C.: μ -Opioid receptor-like immunoreactivity in the rat median eminence: Comparison with the distribution of opioid peptides. Submitted, 10/7/97.
8. Cullinan, W.E., Herman, J.P., Battinglia, D.F., Morano, M.I., Helmreich, D., Akil, H. and Watson, S.J.: Pattern of immediate early gene expression in rat following acute stress
9. Curran, E.J., Akil, H. and Watson, S.J.: Mu and kappa opioid receptor mRNA expression patterns by opioid and tachykinin peptidergic efferent neurons of the nucleus accumbens. In prep, Submitted to J. Comp. Neurol., 3/30/00.
10. Day, H.E.W., Badiani, A., Oates, M.M., Vittoz, N.M., Robinson, T.E., Watson, S.J. and Akil, H.: Environmental novelty differentially affects amphetamine-induced *c-fos* mRNA expression in subregions of the bed nucleus of the stria terminalis and amygdala. J. Neurosci., Submitted 6/29/00, Under revision 8/8/00.
11. Devine, D.P., Watson, S.J. and Akil, H.: Orphanin FQ increases activity of the hypothalamic-pituitary-adrenal axis and enhances physiological responses to stress. In prep.
12. Gutstein, H.B., Burke, S., Watson, S.J. and Akil, H.: The effect of acute and chronic morphine administration on RGS4 levels. In prep.
13. Gutstein, H.B., Cullinan, W.E., Huang, E., Watson, S.J. and Akil, H.: Do pain and non-noxious stress elicit different patterns of spinal *c-fos* activation? In prep, 2/98.
14. Gutstein, H.B., Cullinan, W.E., Thome, J.L., Burke, S., Thompson, R.C., Watson, S.J. and Akil, H.: Does noxious stimulation induce a different pattern of *c-fos* activation and corticosterone response than non-noxious stressors? In prep, 2/98 for J. Neurosci.

15. Gutstein, H.B., Cullinan, W.E., Thome, J.L., Akil, H., and Watson, S.J.: Increasing the intensity of noxious stimulation causes c-fos activation patterns distinct nuclei of rat brain. In prep.
16. Helmreich, D.L., Itoi, K., López-Figueroa, M.O., Akil, H. and Watson, S.J.: Norepinephrine-induced CRH and AVP gene transcription within the hypothalamus: Differential regulation by corticosterone. Submitted to *Mol. Brain Res.* 8/8/00.
17. Herman, J.P., Cullinan, W.E. and Watson, S.J.: Involvement of the bed nucleus of the stria terminals in tonic regulation of paraventricular hypothalamic CRH and AVP mRNA expression. In prep.
18. Herman, J.P., Cullinan, W.E., Morano, M.I., Akil, H. and Watson, S.J.: Ventral hippocampal structures regulate hypothalamic-pituitary-adrenocortical response to acute stress. In prep.
19. Ibrahim, H., Hogg, A.J., Healy, D.J., Haroutunian, V., Davis, K.L., Watson, S.J. and Meador-Woodruff, J.H.: Ionotropic glutamate receptor binding and subunit mRNA expression in thalamic nuclei of elderly schizophrenics. *Am. J. Psychiatry*, Submitted 8/99.
20. Kabbaj, M., Norton, C.S. Kollack-Walker, S., Watson, S.J. Watson, Robinson, T.E., Akil, H.: Social Defeat Alters the Acquisition of Cocaine Self-Administration: Role of Individual Differences in Cocaine Seeking Behavior. *Psychopharmacology*, Submitted 7/15/00.
21. Kollack-Walker, S., Watson, S.J. and Akil, H.: Offensive and defensive behaviors correlate with patterns of c-fos expression following fighting. In prep.
22. López, J.F., Zimmer, C.A., Watson, S.J. and Vázquez, D.M.: Chronic unpredictable stress and antidepressant modulation of serotonin 2a, mineralocorticoid, and glucocorticoid receptors. Submitted.
23. López-Figueroa, M.O., Caamaño, C., Marin, R., Guerra, Borja, Alonso, R., Morano, M.I., Akil, H. and Watson, S.J.: Direct detection of nitric oxide production in living cells using the DAF-2 DA method. Resurrected (from '99) and submitted to *J. Chem. Neuroanat.*, 8/00.
24. López-Figueroa, M.O., Day, H.E.W., Bagnol, D., Zimmerman, E.M., Akil, H. and Watson, S.J.: Time course and neuronal central and peripheral pathways involving nitric oxide synthase mRNA expression in experimental colitis. *J. Neurosci.*, Submitted 4/30/99.
25. Lu, X.-Y., Bagnol, D., Burke, S., Akil, H. and Watson, S.J.: Differential distribution and regulation of OX1 and OX2 orexin/hypocretin receptor mRNA in the brain upon fasting. *Horm. Behav.*, Submitted 2/2/00.
26. McLaughlin, D.P., Fox, C.A., Meador-Woodruff, J.H., Haroutunian, V., Powchik, P., Davidson, M., Davis, K.L., and Watson, S.J.: Expression of mRNAs encoding key molecules of the dopaminergic system in the A9 region in schizophrenia. *Molec. Psych.*, Submitted.
27. McLaughlin, D.P., Little, K.Y., Lopez, J.F. and Watson, S.J.: *In situ* hybridization analysis of the expression of serotonin transporter mRNA in the human raphe nuclei. In prep.

28. Morano, M.I., Caamano, C.A., Kwak, S.P., Watson, S.J. and Akil, H.: Evidence of corticotropin-releasing factor hypersecretion in the aged fisher-344 rat. Neuroendocrinology, Submitted 3/97.
29. Morano, M.I., Caamaño, C.A., Watson, S.J. and Akil, H.: Glucocorticoid and mineralocorticoid receptor protein levels in the aged hippocampus of the rat. In prep.
30. Morano, M.I., Caamano, C.A., Kwak, S.P., Watson, S.J. and Akil, H.: Effect of aging on hypothalamic Corticotropin Releasing Hormone. In prep.
31. Morano, M.I., Caamaño, C.A., Vazquez, D.M., Watson, S.J. and Akil, H.: Protein levels of the glucocorticoid receptor, mineralocorticoid receptor and heat shock protein-90 in the rat hippocampus: effect of adrenalectomy. In prep.
32. Morgan, C., Thompson, R.C., Watson, S.J. and Akil, H.: Proopiomelanocortin cDNA cloning and photoperiodic expression in golden hamster testis. In prep, 4/99, rev. 10/99.
